The Ultimate Dvd Region Hack Guide Book

"Say Goodbye to region protection"

Written By Antony Costa

October 5th 2004

Introduction

Hello and welcome to the guide, this e-book will guide you through the process of making your DVD player region free and could also help you

unlock hidden features within your DVD player. This could enable you to add SVCD and VCD functionality or even remove macro-vision.

What is region protection?

Because DVD is subject to the same issues of piracy and market sharing that govern the entire video industry, DVD region encoding was introduced to set geopolitical boundaries for compatibility of DVDs and players. For instance, a DVD encoded for Region 1 can only be played on a Region 1 (U.S. and Canada) DVD player.

Currently there are six global DVD regions, and DVD manufacturers can encode their product to play in any combination of regions.

- **REGION 1 -- USA, Canada**
- **REGION 2 -- Japan, Europe, South Africa, Middle East, Greenland**
- **REGION 3 -- S.Korea, Taiwan, Hong Kong, Parts of South East Asia**
- **REGION 4 -- Australia, New Zealand, Latin America (including Mexico)**
- **REGION 5 -- Eastern Europe, Russia, India, Africa**
- **REGION 6 – China**
- **REGION 0 or REGION ALL -- Discs are uncoded and can be played Worldwide, however, PAL discs must be played in a PAL-compatible unit and NTSC discs must be played in an NTSC-compatible unit.**

The end result is that DVDs encoded for regions other than Region 1 cannot be played on a region 1 DVD player, also, players marketed for other regions cannot play region 1-stamped DVDs. That is until now!

Can I remove region protection?

Most DVD Players can be made region free with a special code that is put in using your remote. Please note the E-book vendor or I cannot be held responsible for any damage caused by you attempting to make your DVD player region free.

Removing region protection

Please look for the manufacturer of your DVD player then simply find your model number and follow the instructions carefully.

A-Trend

AD-L528

To convert this player into a multiregion DVD player please follow these simple instructions (assume you are using the remote control unless otherwise stated):

- Switch on the player making sure no disc is present
- Press Pause on the remote
- Press: 3, 1, 4, 1, 5 and 9 on the remote
- Press the region number, 0 for multiregion
- Press Pause
- Turn the unit off then back on and you're good to go

Alternative

- Switch on the DVD player
- Press 'stop' on the remote
- Press '1', '9', '9', '9' then 'Enter'
- The region menu appears
- Select 'All' to make the player multi-region

Having Problems?
Although we take every care to ensure that the hacks supplied here are correct, mistakes can be made. If the above hack does not work at first, please firstly ensure that you have followed the instructions exactly. Try repeating the process a couple of times.

Helios

To convert this player into a multiregion DVD player please follow these simple instructions (assume you are using the remote control unless otherwise stated):

- Open the disc tray
- Press Setup, 1, 9 and 9 on the remote
- Select the region

Having Problems?
Although we take every care to ensure that the hacks supplied here are correct, mistakes can be made. If the above hack does not work at first, please firstly ensure that you have followed the instructions exactly. Try repeating the process a couple of times.

LE-511

To convert this player into a multiregion DVD player please follow these simple instructions (assume you are using the remote control unless otherwise stated):

- Switch on player
- Press: Stop, 1, 9, 9, 9
- Hidden menu appears
- Set the "Zone" field to All or a specific region

Having Problems?
Although we take every care to ensure that the hacks supplied here are correct, mistakes can be made. If the above hack does not work at first, please firstly ensure that you have followed the instructions exactly. Try repeating the process a couple of times.

Acoustic Solutions

DDVD-150, DVD-321 DVD-421, DVD-451

Multi-Region:

- **Open** the tray
- Press the **Setup** button on the remote
- Press **Next**, **Prev**, **Next** and **Prev**
- Enter the region code set-up
- Using the **Left** and **Right** buttons set **Ver** to **255** for region free or **1** for region 1, **2** for region 2 and so on

VCD Hack:

- Repeat the above operation but instead of entering the region code set-up press the **Down** button three times
- Using the **Left** and **Right** buttons set **Ver** to **5000** to play VCDs or SVCDs

DVD-521, DVD-551

Multi-Region:

- Press the **Setup** button on the remote
- Press **Next**, **Pause/Step**, **Prev** and **Next**
- You should now be in a service menu where you can set the region to **1**-**8**, or **Bypass** for Region free. Note that *Bypass* will not play RCE discs.

DVD-651

Multi-Region:

- Power **On** and **Open** the tray
- Using the remote press **Setup**, **Next**, **Prev**, **Next** and **Prev**
- Enter the region code set-up
- You can now press **Up** and **Down** to go through several options
- Each option has a range of numeric values access by pressing **Left** or **Right**. When you're finished, press **Setup**. Each option is shown with the prefix **VER**.

    VER 1 = Region 1
    VER 2 = Region 2
    VER 3 = Region 3
    VER 4 = Region 4
    VER 5 = Region 5
    VER 255 = Multi Region

    VER 3001 = Parental Control Enable
    VER 3000 = Parental Control Disable

    VER 4001 = Macrovision Enable
    VER 4000 = Macrovision Disable

    VER 5001 = VCD and DVDR disable
    VER 5000 = VCD and DVDR enable

AXDVD-2000

Multi-Region:

- Power **On** and then using the remote
- Press **Set-up**
- Press **1**, **3**, **6**, **9**, **8**, **8**, **8** and **8**
- Scroll **Down** to version
- Press **Play**
- Scroll **Up** or **Down**
- Press **Set-up**

Afreey

PDV-2000, ADV-2360

Multi-Region:

The procedure must be done **WITHOUT** a disc in the player:

- Turn **On** the player **WITHOUT** a disc in the player
- Press **Setup** on the Remote
- In the Setup menu, press in sequence the following buttons: **Sub-T**, **Zoom**, **Prev** and **Next**. Then on the top of the screen you will see "**XX1XX**"
- With the arrows on the remote, press **Left** or **Right** to change until the desired region number appears
- After you have selected the Region, press **Setup** to go back to the main screen

LD-2020. LD-2060

Multi-Region:

- Press the **Setup** button on your remote control
- Using the onscreen menu, select the **Preferences** option
- Press the **Still/Step** button on your remote control
- Press the **Prev** button on your remote control
- Press the **Next** button on your remote control
- You will now enter the hidden setup page, and can change the player to any region or set it to region free. You can also disable Macrovision from this menu

This hack may not work on all versions of firmware. Try this hack if you have a machine that the above fails on:

- Press the **Setup** button on the Remote Control
- Key in the numbers **3**, **8**, **8**, **8** and **3** from your Remote Control
- Use the **Arrow keys** to change between regions or select **Bypass All**

Aiwa

XD-DW1, XD-DW5, XD-DW7

Multi-Region:

- Power **On** the player and insert a disc into the unit
- **Close** and then **Open** the lid
- Quickly press the **Stop** button a wait a moment
- Using the remote press **8**, **7**, **2**, **0** and then **1** for region one, **2** for region two, and so on, or **>>** for region free.(Note: RCE discs will require specific region set)

If the above fails to work then repeat the above but on last step enter:-

- Using the remote press **8**, **7**, **1**, **0** and then **1** for region one, **2** for region two, and so on, or **>>** for region free

XD-DV170, HT-DV50

Multi-Region:

- Press the **Power** button on the player to turn the unit **Off**
- Press and hold the **Top Menu**, **Menu** and **OSD** buttons on the unit until the word **Factory** appears on the LCD display
- Press the **Power** button on the player to turn the unit off
- Insert any disc and power the player **On**

If the above does not work

- Press the **Power** button on the player to turn the unit off
- Press and hold the **Top Menu**, **Menu** and **OSD** buttons on the unit until the word Factory appears on the LCD display
- Quickly press the **Power** button on the player to turn the unit on

XD-DV290, XR-DV370KR

Multi-Region:

- Press the **Pause** button on your Remote Control
- Using your Remote Control enter the code **3**, **1**, **4**, **1**, **5** and **9**
- Press the **0** button on your Remote for Region free, **1** for Region 1 or **2** for Region 2 (Note: RCE discs will require specific region set)
- Press the **Pause** button on your remote control
- Power off your player and wait a few seconds
- Power on your player

If the above fails to work then you may wish to try:-

- Power **On** the player with no disc inserted

- Wait for the "No Disc" message on screen
- Using the remote press **Pause**
- Using your Remote Control enter the code **3**, **1**, **4**, **1**, **5** and **9**
- Press the **0** button on your Remote for Region free, **1** for Region 1 or **2** for Region 2 (Note: RCE discs will require specific region set)
- Press **Pause**
- Power **Off** the player for a few seconds and power back **On**

To view the firmware version of this player:

- Press the **Setup** button on the Remote Control
- Select **TV Aspect** and place the cursor on the **16:9 Wide** option
- Using the Remote Control enter the code **1**, **3**, **9**, **7**, **1**, **3** and **9**
- Press the **Enter** button
- You should now see the version information screen
- Pressing **Setup** button on the Remote Control to exit this info screen

XD-DV480

Multi-Region:

Converting the player to an alternative region:

- Supply power to the unit and power on from standby mode via the remote
- Wait until **No Disc** is indicated on the fascia
- Now press **Pause** followed by **3**, **4**, **2**, **2**, **9** and then **2**
- The display should now read **CODE**
- Now press **0**, **0** for region free or **0** then **1** for region one, **2** for region two, and so on (Note: RCE discs will require specific region set)

If the above modification fails to work then the alternative method below may work:-

- Connect the DVD player
- Use the **Remote Control** to turn power on
- Wait until **No Disc** appears
- Press **Pause** and type the following code, **8**, **9**, **2**, **6**, the display will show "**CODE__**"
- Within 5 seconds press **00** for all regions
- Press **Pause** and **Power**

XD-520KS

Multi-Region:

- Turn **On** player
- **Open** the disc tray and make sure its empty.
- Make sure you can see the DVD on your TV screen
- Press **Menu** on remote (not top menu) you should see the on screen pictorial graphics on your TV screen.
- Using the remote, press **1**, **6** and **7**
- On the screen you should see over the top of the graphics "region 1-6"
- Press **Mute** on the remote and next to "region 1-6" you should see "all"
- Power **Off** player via remote and the DVD should close the tray.
- Re start the unit, put in a region disc and it should play

Multi-Region:

- Press the **DVD/CD** button on the remote control
- Press the **Open** button on the remote control to open the drive tray
- Using the remote control, press the buttons **C**, **2**, **5**, **8**, **0** and **C**
- The word **TESTMODE** should appear on the DVD display, and the onscreen display should indicate the current region setting
- Press the **Up Arrow** on your remote control until **14 02** is shown on the onscreen display. Note: The **02** indicates the current region and may be different depending on what your player is currently set to
- Using the remote control, press the buttons **1** and then **4**, then enter **0** and **0** for multi-region, or **0** and **1** for region 1, or **0** and **2** for region 2, and so on
- Press the **Enter** button on the remote control
- Press the **Return** button on the remote control
- The word **TESTMODE** should appear on the DVD display
- Press the **C** button on your remote control
- A message should be displayed stating **EEP CLR** followed by **EEP ERR**
- Place your DVD in the drive tray
- Press the **Return** button on the remote control

HT-DM150

Multi-Region:

First completely power off the played and unplug from mains for 30 seconds, this clears anything in players RAM memory. Plug the unit back into mains then follow steps below:-

- Turn power **On** with no disc in the tray
- Press **Enter**
- Press **8**, **4**, **2**, **6**, **9**
- Press **Enter**
- Tray should **Open**
- Tray will **Close** and DVD will power **Off**

- Turn on DVD from remote and it is now Region FREE

Akai

DVP-1000

NOTE: Be VERY VERY careful when changing the settings below, you can do a lot of harm if codes are set wrongly. There are no known codes/combinations to rectify problems or reset the player.

Multi-Region:

Converting the player to a different region:

- Press the **On/Off** button on the player to turn it off.
- Press and hold the buttons **Eject** and **A-B** together, and then press the **On/Off** button on the player to turn it back on.
- When the text **A:00 D:12** appears on the units display, release the **Eject** and **A-B** buttons.
- By pressing the **Play** button to increase, and the **Stop** button to decrease, change the value of **A** until it reads **A:05**.
- By pressing the **Skip-Forward** button to increase, and the **Skip-Backward** button to decrease, change the value of **D** until it reads **D:00** for region free, **D:01** for Region 1 or **D:02** for Region 2, depending on your requirement.
- Press the **On/Off** button on the player to turn it off.

Press the **On/Off** button on the player to turn it on.

DVP-2000

NOTE: Whilst most movies will play with the region set to 0, some Region 1 titles require you to select that zone before they will play.

Multi-Region:

Converting the player to an alternative region:

- Press the **On/Off** button on the player to turn it off .
- Press and hold the buttons **Fast Forward** and **Stop** together with the **black button** located on the right hand underside of the machine, and then press the **On/Off** button on the player to turn it back on.
- When the Akai logo appears, release the **Fast Forward** and **Stop** buttons but keep holding the **Black button** on the underside of the player.

- A list of numbers will appear in columns. Press the **Enter** button once on your remote control, the second column of numbers should now be selected.
- Press the **Cursor Right** button on your remote control to select the second number. Change this to **00** for region free, **01** for Region 1 and **02** for Region 2.
- Press the **Enter** button once on your remote control to confirm the region change.
- Press the **On/Off** button on the player to turn it off, then release the **Black button** on the underside of the player.
- Press the **On/Off** button on the player to turn it on.

DVP-2500

Multi-Region:

- Turn the player **On**
- **Open** the players drawer
- Enter **8**, **9**, **2**, **6** on the remote followed by **0**

DVP-3410

Multi-Region:

- Press **Open** button on the remote to open the drive tray
- Press **8**, **4**, **2** and **1** keys on the remote
- A service menu will appear
- Use cursor keys to switch to region or Macrovision and press **Select**
- Press **1** for region 1, **2** for region 2, and so on or **9** for multi-region playback

DVP-4000

NOTE: Whilst most movies will play with the region set to 0, some Region 1 titles require you to select that zone before they will play.

Multi-Region:

- Switch the power **Off**, press the **Dimmer Switch** & the **Back Skip** buttons at the same time.
- **Still** holding the keys down, power the machine **On**.
- Four Lines appear on the front panel display. Using the remote control, press **1999** using the numerical keys.
- The display will change to **A-0000 D-04** (Region 3 at this stage)
- Set Region code using the following:-

REGION	CODE	DISPLAY
0	"00"	A-0000 D-00
1	"01"	A-0000 D-01
2	"02"	A-0000 D-02
3	"04"	A-0000 D-04
4	"08"	A-0000 D-08

- Push the **Enter** key on the remote.
- Turn **Off** the unit using the **On/Off** switch, **not** Standby.
- The next time you turn on the unit, the region should be set.

DVP-4500

Multi-Region:

- Connect the machine to the mains but **do not** power on, also ensure there is no disc inserted
- Press and hold down both the **Dimmer** and **Reverse Skip** buttons on the front panel and then press the Power ON
- The display should show "NAKAMICHI"
- Hold the **Dimmer** & **Reverse Skip** buttons for a few seconds and the Display should change to "___ ___ ___ ___" from "NAKAMICHI". Wait for a minimum of 5 seconds (at this stage you're **not** pushing the **Dimmer** & **Reverse Skip** buttons any longer), then using the handset's numerical keys press **1**, **9**, **9**, **9**
- The display should now show: **A-00 D-??**, Where D-?? indicates the present region
- To change the region code, punch in the new code (i.e. 01 for Region 1, 03 for Region 3, etc.) and after that press the **Enter** button (located next to the numbers keypad on the Handset). The display should now change (slowly) to D-01 (or whichever new region you have assigned to, as above
- Completely Power **Off** and the machine is set to the new Region.

Note: This also works as a region **0** hack, but be aware that some discs may refuse to play unless the region you have selected matches the region of the disc. The hack is also indefinite and has no limited lifespan, and can therefore be performed as many time as required

DVP-8000

Multi-Region:

- Turn the player **On** and ensure there is no disc in the draw
- On the remote key in **8**, **9**, **2**, **6** plus the region number
- For region free **8**, **9**, **2**, **6** followed by **0**

DVR-2100SS

Multi-Region:

- Power on the player and Open the tray
- Press 3, 8, 3 and 8 on the remote control
- A menu will then appear at the top of the screen
- Press Enter until the desired region is displayed
- Press 1 to clear the menu

DHT-300

Multi-Region:

- Eject DVD disc from the unit and **Close** with no disc
- In status of **No Disc**, press **Stop** button on the remote
- Using the numeric buttons on the remote press **1**, **9**, **9** and **9**
- A Menu is shown with the current region code
- Move the cursor to **Region code** and press **Enter**
- Then set the region code to **Free** by using arrow **Up/Down** key on the remote and press **Enter** again
- Press **Setup** button on the remote

HV-DH10, HV-DH10N

Multi-Region:

- Power **On** player and insert a disc
- Wait for message "Check region code" to appear
- Using a remote control press **Display**, **Top Menu** and **Play** quickly. If it does not work try pressing **Disk Menu** instead of **Top Menu**

Akura

ADV-145S, ADV-147AS

Multi-Region:

- Power **On** without a disc in the player
- Press the **Setup** key on the remote
- Press **Vol+**, **Vol-**, **Vol+** and **Vol–** (these are the buttons marked + & - that are under the audio key on the remote)
- This will then display region number on top right of screen
- Use the **Right** arrow key until **255** is displayed (the numbers **1** to **6** are the different regions and **255** is multi region)
- Press **Setup** to exit
- Your player is now region free

Alba

DVD-45

Multi-Region:

- Turn **On** player
- **Open** disc tray either using the **Eject** on the player or **Open** on the remote
- Press **2**, **8**, **1** and **2**
- A menu should pop up, press **Enter** until **9** appears
- DVD player is now region-free

DVD-59

Multi-Region:

- Power **On** player
- Press **Open/Close** on remote
- Press **Prog** once
- Press **Enter Three** times
- Region should be displayed on the Screen
- Use **Up** or **Down** keys until **0** is selected then press **Stop** on the Remote which will confirm the change. **0** is region Free or you can select **1** - **6** instead if you only want it for a specific region only.
- Press **Open/Close** or **Stop** on the remote to exit

DVD-103

Multi-Region:

- Power **On** player
- Press **Pause** on the Remote
- Enter code **3**, **1**, **4**, **1**, **5** and **9**
- The player display should read "**COdE - -**"
- Enter the desired Region (**0** = all, **1** = Region 1, **2** = Region 2 etc.)
- Press **Pause** again
- Power off player
- Wait **10** seconds and then power **On** again

DVD-104

Multi-Region:

- Press **Open/Close** to open the players tray
- From the Remote key in **3**, **3**, **0**, **8** and **8**
- Now press **1** for Region 1, **2** for Region 2 and so on. For region free press **0**
- Press **Open/Close**

DVD-106

Multi-Region:

- Using the remote press **3**, **1**, **4**, **1**, **5** and **9**
- The display on the fascia should now show "**COdE--**"
- Now press **1** for Region 1, **2** for Region 2 and so on. For region free press **0**
- **Press Pause on the remote and power the player Off**
- **Wait 10 seconds before powering the player back On**

DVD-108

Beware: UK retailer Argos are selling the Alba 108xi which looks similar, but alias, is not multi-region out of the box. However, we do have the code for the **XI** listed below.

Multi-Region:

- This player should be region free straight from the box

If you are still unable to play no home region discs then try the following:-

- Press **PAL/NTSC**
- Press **Menu**
- Press **0**

VCD Hack:

- **Open** the tray
- Press **2**, **8**, **1**, **2** and **Enter**
- A service menu will appear
- Push in the tray with VCD on board
- Wait a second and the **Stop** icon appears on top left of screen
- Press **1** and VCD will play

DVD-108XI

Multi-Region:

- Power **On** the unit and **Open** the tray
- Press the **Setup** button
- Use the **Right** key until you highlight the **Custom** menu
- Press **3**, **3**, **3** and **3**
- A service menu will then be displayed
- Use the direction keys to select the region region and then press **Enter**

DVD-109

Multi-Region:

- Insert a region **1** disc and press **Play**
- The Message "Wrong Region" will be displayed
- Press the **Display** button on the remote control
- Go to the **TC** entry and enter **05**
- Press **Play**
- This hack is lost once the power is turned off the unit so you'll need to re-enter it each time you wish to view a region one disc.

DVD-114

Multi-Region:

- Press **Open**/**Close** on the remote
- Press **3**, **3**, **0**, **8**, **8** followed by the region number i.e **1** for region 1, **2** for region 2 and so on. Press **0** for region free
- Press **Open**/**Close** on the remote

DVD-119

Multi-Region:

- Empty Tray
- Press **Setup** on Remote
- Press **Next**, **Prev**, **Next** and **Prev**
- **Ver** should appear in the top right
- Change to **255** using **Left** and **Righ**t buttons
- Turn **Off** and back **On**

DVD-129

Multi-Region:

- Turn the player **On** and make sure there is no disk in the machine
- Take the remote control and press the **Setup** button
- Type in **1**, **3**, **6** and **9** and a selection screen is opened
- Use the **Up** or **Down** button to select region (these are listed **1** to **6** or **0** for multi region)
- Press **Select**/**Enter**/**OK** to keep the choice

TDVD3450

Multi-Region:

- Press **DVD** mode button on the TV panel
- Press **Set Up** on the remote control
- Press **Next Arrow** on the remote control (4 times) to open the **Version Screen** which shows the words version 2 on the top right hand corner of the TV screen
- Use **Arrow Keys** on remote to change version to **255** which is the setting for multi region
- Press **Set Up** on remote to save setting

Apex

AD-600A

Multi-Region:

- Press the **Setup** button on your remote control
- Using the onscreen menu, select the **Preferences** option
- Press the **Still/Step** button on your remote control
- Press the **Prev** button on your remote control
- Press the **Next** button on your remote control
- You will now enter the hidden setup page, and can change the player to any region or set it to region free. You can also disable Macrovision from this menu

If the above fails to work then you may want to try the following:

- Using the remote press **Stop**
- Press **3**, **8**, **8**, **8** and then **3**
- If the above fails to display a service menu then you may want to try **3**, **7**, **7**, **7** and then **4** or **8 4**, **2**, **1** and then **3**
- This will display a system menu where you can select the required region or set the player to region free by selecting **9**

To change the video output format between PAL and NTSC:

- Press the **Set-up** button on your remote control
- Press the buttons **7**, **2**, **5**, **5** and **5** on your remote control

To see what version of the firmware your player is using:

- Press the **Set-up** button on your remote control
- Press the buttons **1**, **2**, **3** and **4** on your remote control

To convert this player to Multi-Region on older firmware:

- Press the **Set-up** button on your remote control
- Using the on screen menu, select the **Preferences** option
- Press the **Still/Step** button on your remote control
- Press the **Prev** button on your remote control
- Press the **Next** button on your remote control

You will now enter the hidden set-up page, and can change the player to any Region or set it to Region Free. You can also disable Macrovision from this menu

AD-1100

Multi-Region:

- **Open** the tray
- Press **3**, **4**, **9**, **7**, **3**, **4** and **0** for region free, **1** for region **1** and so on
- If you've selected region free then the message "region free" appear

AD-1200

Multi-Region:

- **Open** the players tray

- Press **1**, **6**, **7** and **Mute**

If the above fails to work then you may wish to try the following:

- Using the remote press **Set-Up**
- Press **Goto** general set-up
- Press **Play**
- Goto **TV** display
- Press **<<** and **>>**

CDV-1100

Multi-Region:

- Press **Open/Close** button on remote
- Press **8**, **4**, **2** and **1** - these will appear in top left-hand side of the screen
- Press **Select**
- Then use **Select** key to change regions
- Set to region **9**
- Then press **Open/Close** button
- The player should now be region free

Cyberhome

AD-N212, AD-N512

Multi-Region:

- Press the **Open** button on the remote control to open the drive tray
- Press the **7** button on the remote
- Press the **6** button again on the remote
- Press the **SEL** button on your remote
- You will now enter the hidden setup page, and can change the player to any region or set it to region free by entering **13** as the country code

This hack may not work on all versions of firmware. Note that the newer **Cyberhome AD-M512** model doesn't appear to support this hack.

DVD-300

Multi-Region:

- Turn **On** the player and make sure there is no disc in
- **Close** the tray
- Press **Menu**, **1** and **9**
- A menu will appear and press **Enter**, this will highlight the Region setting
- Press the number of the region required i.e. **0**, **1**, **2** etc.
- Press **Enter** again
- Press **Open/Close** tray

AD-L528, DVD-302

Multi-Region:

- Turn **On** the player
- **Open** the tray
- Press **Stop**
- Enter **1**, **9**, **9**, **9**
- Select the required region code. i.e. **1** for region 1, **2** for region 2, and so on.
- Press **Enter** to confirm change
- **Close** the tray with the remote

If the above fails to work then you may wish to try:

- Turn **On** the player
- **Open** the tray
- Press **Stop**
- Enter **3**, **3**, **5**, **8**
- Select the required region code. i.e. **1** for region 1, **2** for region 2, and so on.
- **Close** the tray with the remote

DVD-400,DVD-402, DVD-405

Multi-Region Hack 1:

- Turn **On** the player
- Press **Setup**
- Enter **1**, **3**, **6** and **9**
- Press 3 x **Left**
- Press 1 x **Right**
- A new entry **Version** appears in the **Setup** menu
- Change the region code with the **Up** and **Down** arrows
- Changing this value to **0** sets the player region free

Multi-Region Hack 2:

- Turn **On** the player
- Press **Setup**
- Enter **1**, **3**, **6** and **9**
- Press 3 x **Left**
- Press 1 x **Right**
- A new entry **Version** appears in the **Setup** menu
- Move cursor **Down** to Version and then cursor **Right** to highlight **B40016c**
- Enter **1**, **3**, **6** and **9**
- Change the region code with the **Up** and **Down** arrows
- Changing this value to **0** sets the player region free

DVD-505

Multi-Region:

- Ensure the tray is **Closed** with no disc
- Press **Menu**
- Press **1**, **1**, **1**, and **1** to **Open** a hidden configuration menu.
- Use **Up** and **Down** arrows to highlight **Configuration** and press **Enter**
- Enter desired region code, i.e. **1** for R.C.-1 and **2** for R.C.-2 etc

Note:- There are rumours that this can only be done 100 times.

Be very careful not to change the option on the second line **Destroy Selection** table. Don't even touch it! Changing this option to "Yes" will disable the possibility to change the code in the future, although updating the firmware will fix this.

There is a firmware update available from www.cyberhome-help.de that renders the machine region code free and also claims to turn off Macrovision. The manufacturer has a firmware update available at www.cyberhome-europe.de that claims to fix a couple of minor bugs with subtitles etc.

CH-LDV710

Multi-Region:

- Press **Setup** on remote control
- Move to **General Setup**
- Press **1**, **3**, **6**, **9** in order
- Then use the **Down** button to select the region you want to set it to (set **0** it will play all discs then)
- Press **Enter**
- Exit out of the **Setup** menu

If this code fails to work then you may wish to try the code listed above.

Cyrus

- Put into DVD screen mode
- Press the DVD **Setup** key and have this set on-screen
- Use remote to key in **1**, **3**, **6**, **9** then immediately press the **Left** navigate arrow 3 times, followed by the **Right** key once. (this takes some practice, so don't stand too close to the TV)
- Now you will see a new option on-screen named VERSION
- Enter into **Version** and select region code as required (which means the code free option)

GTV-34RDVD

Multi-Region:

- Press the **DVD** function on your TV set
- Press **Set-up** on your remote control
- Press **1**, **3**, **7** and **9**, in order, one at a time
- Select option and using your remote control, change it to **1** for region 1, **2** for region 2, and so on, or **0** for multi-region playback

Grundig

GDV-100D

NOTE: Please note that these conversions may only work a maximum of 25 times! And after this time the machine may end up locked to the last region changed to.

Region One:

- Press the buttons **Play**, **2**, **7** and **4** on your remote control. The onscreen display should look like this: '____ ____'.
- Using the number keys on your remote control, enter the code **005000128156**.
- Press the **Play** button on your remote control.
- The onscreen display should turn red, indicating that your region settings have been changed.

Region Two:

- Press the buttons **Play**, **2**, **7** and **4** on your remote control. The onscreen display should look like this: '____ ____'.
- Using the number keys on your remote control, enter the code **002000128156**.
- Press the **Play** button on your remote control.
- The onscreen display should turn red, indicating that your region settings have been changed.

Factory Reset:

NOTE: This has only been tested on the Philips 710. There is an outside chance this may also get round the 25 region change limit, but will not unlock a region locked machine.

- Press the buttons **Play**, **1**, **5** and **9** on your remote control. The onscreen display should look like this: '____ ____'.
- Using the number keys on your remote control, enter the code **004001 00014 0**.
- Press the **Play** button on your remote control.
- The onscreen display should return to the original Philips splash screen, all settings will be reset back to factory defaults.

GDV-110, GDV-130

Multi-Region:

- Press the **Open** button on the Remote
- Then press **Setup**

- Press the **9** button on the Remote for **Region Free**, or **1** for **Region 1**, **2** for **Region 2**, and so on
- Press the buttons **2**, **0**, **0** and then **0** on the Remote
- Press **Step**
- Press **Shuffle**
- Press **Next**

Macrovision Hack:

- Press **Setup**
- Press **Stop**
- Press **Title**
- Press **Previous**
- Press **Setup**

Firmware Check:

- Press **Open**
- Press **Setup**
- Press **Shuffle**
- Press **Step**
- Press **Next**
- A secret menu will appear, inside which you can scroll down until the words **Debug Item** appears. This is where the current region status is displayed

GDV-200, GDV-210, GDV-212

Multi-Region:

- **Open** the DVD players tray
- Place a Region 1 disc in the tray, but don't close it
- Press the buttons **0**, **1**, **2** and then **3** on the Remote Control in order, one at a time
- Press the **Play** button on either the Remote or the player

Restore to Region Two:

- **Open** the DVD players tray
- Place a Region 2 disc in the tray, but don't close it
- Press the buttons **Return** and then **Play** on the Remote Control in order, one at a time

Earlier firmware versions will not play **The Matrix** and require an upgrade, this does not remove the hack. Earlier firmware freezes with RCE encoded discs.

GDV-211A

Multi-Region:

- Power **On** your machine
- Press the **Stop**, **Open/Close** and **Skip** buttons on your player simultaneously and hold down for **3** seconds
- A hidden menu should appear. Release the **Stop**, **Open/Close** and **Skip** buttons on your player
- Select **Region Number** from the hidden menu and choose the **Free** option
- **Exit** the menu

Earlier firmware versions will not play **The Matrix** and require an upgrade, this does not remove the hack. Earlier firmware freezes with RCE encoded discs.

GDV-220

Multi-Region:

- Switch the player **On**
- Press and hold the following buttons for 3 seconds, **Stop**, **Open** and **Skip**
- When the hidden menu appears select region free or a specific region
- **Exit** the menu

GDV-520

Multi-Region:

- Press **Menu**
- Now key in **1, 6, 7**
- Press **1** for Region 1, **2** for Region 2 and so on
- For Multi-Region mode press **Mute**

GDV-620HT

Multi-Region:

- Open the the player drawer
- Press **9**, **8**, **1** and **7** on the Remote
- You will now be in the hidden menu where you can change the Region from 1 to 6 by pressing **Enter** on the Remote. Selecting **9** sets it to Region free
- You can also disable Macrovision from this screen
- If your TV does not support NTSC, you can also set the output to PAL from this screen

Xenaro GDP-3100, GDP-3200, GDP-4204, GDP-5100, GDP-5120, GDP-6150

Multi-Region:

- Get into the Service Menu. This is not intended for home users, only for service technicians. Therefore you're asked for an access code, it is **8500** for all Xenaro DVD Players
- Activate "**System Messages**" using the Service Menu
- Leave the Service Menu and get into the "**System Information**" Menu
- When you see the System Info, enter the following code on the remote control. Note that the player will not print the code on the screen, you have to enter it blindly.
    - The code for the **3100** is: **70307194**
    - The code for the **3200** is: **70307195**
    - The code for the **4204** is: **70307196**
    - The code for the **5100** is: **70307196**
    - The code for the **5120** is: **70307198**
    - The code for the **6150** is: **70307192**
- A system message should appear. It will not appear if you got the code wrong or if you did not activate system messages in the service menu. Confirm the message with **Ok** on the remote
- Now a window appears in which you can change your region code. Values **1** to **8** and "**none**" are possible. "**None**" will disable the internal check of region codes (i.e. makes the player CodeFree), but RCE titles might not work. This doesn't really matter, as you can change the code as often as you wish to match a specific disc
- If you want to, you can disable System Messages again using the Service Menu after you changed the code

Harman/Kardon

DVD-1

Multi-Region:

- Put the player into **Standby** mode, with **no** disc in the tray
- On the Remote Control press: **3**, **1**, **4**, **1**, **5**, **9** and **2**
- Then press the zone you want: **1-4**
- Power the player **On**
- Play the disc you want to

DVD-5

Multi-Region:

- Put the player into **Standby mode** with and ensure there is **no** disc in the tray
- Key in the following on the Remote Control: **3**, **1**, **4**, **1**, **5**, **9** and **2**

- Now key in the number of the Region you require **1** for Region 1, **2** for Region 2 etc.
- Turn the player on
- Open the tray and play the disc of your choice

Note: that the Region code entered is stored when the player is switched off, therefore you will need to change Region for each disc. However it maybe that entering '0' for the Region code will set the player to Region free operation.

DVD-10, DVD-20, DVD-25, DVD-50

Multi-Region:

- Turn the player on

- Press **Program 6**, **Program 5**, the characters should then change to **07 FE**, if they don't then continue pressing until they do
- Press **Enter**
- Power the player **Off** then back **On** again

F-DV25, **F-DV55**, **DA-5630**, **DC-593W**, **DC-593NW**, **DK-4821P**, **DK-8621P**, **DS-8400**, **LH6530**, **DVD-2000**, **DVD-2240N**, **DVD-2230**, **DVD-2300**, **DVD-2330P**, **DVD-2340**, **DVD-2380**, **DVD-3000**, **DVD-3200E**, **DVD-3230**, **DVD-3520**, **DVD-3530**, **DA-3530A**, **DVD-3350E**, **DVD-3351**, **DVD-3630A**, **DVD-4010**, **DVD-4210**, **DVD-4710**, **DVD-4721P**, **DVD-4730**, **DVD-4750**, **DVD-4830**, **DVD-4930**, **DVD-4950**, **DV-4941P**, **DVD-4950S**, **DVD-5500N**, **DVD-5500P**, **DV-5522**, **DV5942P**, **DVD-6812P**, **DVD-7711P**, **DV-7721P**, **DK-7821P**, **DVD-8621P**

It is most likely to work on most **LG** players not listed above, although more recent players may have a different chipset. If it works on your player and its not listed above then please do let us know.

Multi-Region:

- Power on the player with no disk in the drive
- Wait for the "No Disc" message to appear
- Press **Pause** and **Enter** on the Remote
- Enter **3**, **1**, **4**, **1**, **5**, **9** on the Remote (the word **COdE** or **FF** appears on the display)
- Enter **0** on the Remote (0 = All Regions, 1 = Region 1, 2 = Region 2, etc.)
- Press **Pause** on the Remote
- Power the player **Off**, wait 30 seconds and then power back **On**

If the above code fails to work then once the player has displayed the "No disc" message press **Stop** before entering the above code. If you have a **DV-5522, DVD-5500N**, **DV-7711P** and **DV-7721P** models then you may need to omit the **Enter** press in step 3. For **DA-3530A** with software version 0.9 omit the steps 5 and 6 - also the hack doesn't stay in the player memory so you'll need to re-enter it if it is powered off.

Firmware Version Display:

Note: Checking the firmware revision may reset the video selection mode so you may need to reapply this after using this option

- Press **Setup** on the Remote
- Select **TV Aspect**
- Place the cursor on **16:9** wide
- Enter **1**, **3**, **9**, **7**, **1**, **3**, **9** on the Remote
- Press **Enter** on the Remote
- Press **Setup** to clear the information once read

Beware: There are reports that entering a code to enable VCD playback may result in the players firmware becoming corrupted thus making the player unusable. It is for that reason we have not listed the code.

DVD-5222P

Multi-Region:

- Ensure no disc is in the player and turn it **On**
- Wait until "No Disc" appears on the LED display
- Press **Pause** on the handset
- Press **3**, **1**, **4**, **1**, **5** and **9**
- The LED display will now show a "Code --" prompt
- Press the single digit of the region desired (1-6, or 0 for all)
- Press **Pause** on the handset
- Turn the player **Off** and wait 5 seconds
- Turn the player back **On** and the hack is now applied

Limit

DVDA-900

Multi-Region Hack

- **Open** Tray
- Press **10+** on Remote
- Press **5**, **3**, **6**, **7**, **5**, **1** and then **9**
- **Close** Tray

VCD Hack

- **Open** Tray

- Press **2**, **8**, **1**, **2**, and then **Enter**
- You should now have the Secret menu up on the screen
- Continue to press **Enter** and you can select the region you want from **1 - 9**
- **Close** drive tray door when finished

Minato

DVD-G1

Multi-Region:

- Press the **Open/Close** button on the Remote Control to open the drive tray
- Press the buttons **0**, **1**, **1** and then **1** on your remote control, in order, one at at time
- A number of **stars** should appear in the top left hand corner of the onscreen display
- Press the button **1** on your Remote Control to select Region 1, or **2** to select Region 2, and so on...
- The word **Region** and then the number you selected should briefly appear on screen to confirm that the hack has been successful, however this may not be the case on some models

Note:- This hack may not work on machines with up to date firmware, although if it doesn't display the stars it doesn't necessary mean it hasn't worked.

Mustek

DVD-V300

Multi-Region:

- Turn **On** the player with no disc in the drive
- Using the remote press **Set-up**
- On the front panel press **Next**, **Stop**, **Pause/Step**, **Previous** and **Next**

DVD-V520, DVD-560, DVD-V562

Multi-Region:

- Turn **On** the player with no disc in the drive
- Press **Set-up**, **Previous**, **Next**, **Previous**, **Next**, **Previous**
- Press the **Right** cursor until **255** appears
- Press **Set-up**

If the above hack fails to work then you may wish to consider using attempting the **DVD-V300** hack above

Disable Macrovision:

- Press **Set-up**, **Next**, **Previous**, **Next** and **Previous**
- Press **Up** and **Left** - you should see **4000**
- Press **Up** and **Left** until you see **3000**
- Press **Set-up**

DVD-V600RZ

Multi-Region:

- Turn **On** the player and open the disc tray
- On the remote press **8**, **4**, **2** and **1**
- This should bring up a service menu
- Press **Enter** to move through the region codes or **9** to enable region bypass

Nakamichi

DVD-10

Multi-Region:

- Connect the machine to the mains but **do not** power on, also ensure there is no disc inserted
- Press and hold down both the **Dimmer** and **Reverse Skip** buttons on the front panel and then press the Power ON
- The display should show "NAKAMICHI"
- Hold the **Dimmer** & **Reverse Skip** buttons for a few seconds and the Display should change to "___ ___ ___ ___" from "NAKAMICHI". Wait for a minimum of 5 seconds (at this stage you're **not** pushing the **Dimmer** & **Reverse Skip** buttons any longer), then using the handset's numerical keys press **1**, **9**, **9**, **9**
- The display should now show: **A-00 D-??**, Where D-?? indicates the present region
- To change the region code, punch in the new code (i.e. 01 for Region 1, 03 for Region 3, etc.) and after that press the **Enter** button (located next to the numbers keypad on the Handset). The display should now change (slowly) to D-01 (or whichever new region you have assigned to, as above
- Completely Power **Off** and the machine is set to the new Region.

Note: This also works as a region **0** hack, but be aware that some discs may refuse to play unless the region you have selected matches the region of the disc. The hack is also indefinite and has no limited lifespan, and can therefore be performed as many time as required

SoundSpace 10, 11, 12, and 21

Multi-Region:

- Press and **hold** the **Track Down** button on the player
- Press the **Power On** button to turn on your player
- Wait until the machine shows "**----**" on the display
- **Release** the **Track Down** button on the player
- Using the main remote keypad, enter the digits **1**, **0**, **1** and **1**, then press **Enter**

The machine should now display "**D-00**" and be region free

Nakio

N2051

Multi-Region:

- Press **Set-up**
- Press **Stop**
- Press Skip **Back**
- Press Skip **Forward**
- A hidden menu will appear
- Scroll down **Regions** list (I think there were 9) "to bypass regions"
- Switch **Off** machine
- Switch back **On**

Narita

T1011

Multi-Region:

- Press **Power On**
- Press **Open/Close**
- Press **Setup** on the remote
- Setup menu will appear key in **4**, **9**, **5**, **4** and **0**
- A version row will now appear
- Select version and set the region **0** for all regions

T1030, T1130

Multi-Region:

- Press Power **On**
- Press **Open/Close**
- Press **Setup** on the remote
- Setup menu will appear key in **4**, **9**, **5**, **4** and **0**
- A new version row will now appear
- Select version and set the region **0** for all regions

NAD

L55

Multi-Region:

- Set the remote control to **DVD**
- Press **Pause** on the remote
- Key in the numbers **3**, **1**, **4**, **1**, **5** and **9** on the remote
- The onscreen display should now show "**Code --**"
- Enter the code **01** for Region 1, **02** for Region 2, and so on, or **00** for multi-region mode
- Press **Pause** on the remote
- Turn **Off** player for **30** seconds
- Turn **On** player

L70

Multi-Region:

- Use remote control switch the player **On**
- **Open** tray using the **Eject** button
- Press **Program** button then **2**, **5**, **1** and **9**
- The presently active code is now displayed
- Enter desired code i.e. 1 for region press **1**, press **2** for region 2 etc
- Press **Disp** button
- Switch player **Off** then **On** again

T531, T571

Multi-Region:

- Switch the unit on
- Press **Pause**
- Key in **3**, **1**, **4**, **1**, **5**, **9**
- The word **Code** appears in the display
- Press **0**
- Press **Pause**
- Switch off and back on again

If the above code fails to work then once the player has displayed the "No disc" message press **Stop** before entering the above code. If this still fails to work then you could try the following alternative method.

- Press **Setup** on the remote
- Highlight the **TV Aspect** option.
- Place the cursor over the **16:9 Wide** option
- Press **1**, **3**, **9**, **7**, **1**, **3**, **9** followed by **Enter**

Beware, although the code is not listed here, there are reports that entering a code to enable VCD playback may result in the players firmware becoming corrupted thus making the player unusable. The above hacks may not work on all versions of firmware.

T550

Multi-Region:

- Ensure the tray is **Open**
- Go to the **Set-up** menu
- Go to **Password** and press **Enter**
- Enter the code **5**, **9**, **7** and **8**
- Press **Enter**, a block with **SVC Code** will appear
- Key in **9**, **2**, **Audio**, **Resume** and **Enter**
- The block will now show **Region Change 0000**
- Select the Region by entering: **5**, **5**, **0**, ***** where ***** = the Region code, Region 1 = **5501**, Region 2 = **5502** etc.
- Press **Enter**.
- The player draw will close and the machine will switch itself into standby

T562

Multi-Region:

- Power **On** machine and ensure the tray is **Closed**
- Using the remote go to **Settings** menu via Set-up
- Enter **7**, **4**, **1**, **1**, **3** and **0** in quick succession
- A menu labelled **Region Set-up** should now appear
- Using remotes navigation keys select required region, or region free
- Press the **Enter** button
- Turn **Off** player
- Turn DVD player back **On**

If the above fails to work then an alternate method is as follows:-

- Power **On** machine and ensure the tray is **Closed**
- Using the remote go to **Settings** menu via **Set-up**
- Enter **5**, **6**, **2**, and region number required, i.e. **1** for region 1, **2** for region 2 etc
- The message **Load default AH setting** will briefly appear
- Turn **Off** player
- Turn DVD player back **On**

NEC

NDV-21, NDV-22, NDV-23, NDV-24,NDV-100

This hack may also work on most other NEC DVD players

Multi-Region:

- Make sure there is no Disc in the unit when you turn it on
- Press **Pause** on the remote
- Key in **3**, **1**, **4**, **1**, **5** and then **9** on the remote
- The word **Code** should appear on the screen
- Press the number for the required region (**0** = multi-Region)
- Press **Pause**
- Turn the unit off then back on and you're good to go

Note:- Some new discs use enhanced regional coding which may not work with the "0 for all" setting. In this case use the specific code for the Region of the

Norcent

DP-300

- Select **Region** then **Bypass**

PH-7500

Multi-Region:

- Turn **On** player
- Press **Eject** on remote control
- Press **8**, **4**, **2** and **1**
- This accesses the region code and Macrovision page where you can select and set the **Country Code**. Select **9** for multi-region
- Press **Select**
- Put a DVD in the tray and press **Play**

Philips

General

Multi-Region Hack 1:

This hack should work on all Philips DVD players as of **06/01/2001** with any firmware version, and other similar models by manufacturers such as **Grundig**, **Marantz** and **Yamaha**. If the hack fails to work then check the sections below to see if your player is listed.

- Send the infra-red code **RC6** (aka **Codeset 4**, **Key 235**) to your player. You can do this with a **OneForAll** remote such as the **OneForAll 6** (or URC7560) or **OneForAll 4 Digital** with the following instructions:

  - Configure the Remote using the setup code **0539**
  - Press the **Magic** button
  - Enter the code **085**

  If you own a **Palm Pilot**, you may also use *Pacific Neo-Tek's OmniRemote* software to generate the **RC6** code using a downloadable .pdb file.

  - Download the .pdb file into your Palm Pilot

- Press the OmniRemote key marked as 955 Multizone

- The onscreen display should show **11** spaces like this: '**-----------**'
- Using the number keys on your DVD player's Remote Control, enter the code **222 222 005 255**. Note that this is 12 digits and the last digit will not show on the on-screen display
- Press the **Play** button on the DVD player's Remote
- The onscreen display should now show the words **No Disc**
- Power off your DVD player, wait **10** seconds and then power back on

Multi-Region Hack 2:

You may also use the following methods for players with firmware 6.2:

- Turn your DVD player **On**
- The display will show you **no disc**
- Press **Play** and then press **1**, **5**, **9** on the DVD Remote
- On DVD display will appear **------ -----**
- Key in **101 040 000 140** on the Remote when you press the last digit you will see a little point
- Press **Play**
- The player will be turned off
- Your DVD is ready

DVD-634, DVD-640

NOTE: Please note that this conversion may only work a maximum of 25 times! After this time the machine may end up locked to the last region changed

Multi-Region:

- **Open** the tray
- Press **0**, **0**, **0** and **0** on your remote control
- Press **0** for region free or **1** for region 1, **2** for region 2 etc.
- To check region **Open** the tray and press **Display** on the remote

DVD-700, DVD-825, DVD-170

NOTE: Please note that this conversion may only work a maximum of 25 times! After this time the machine may end up locked to the last region changed

Region One:

- Press **Play**, **2**, **7** and **4** on the Remote Control. The on-screen display should then look like this: '____ ____'.
- Enter the following code using the Remote Controls number pad **005000 128 256**.
- Press the **Play** button on the Remote Control.

- The onscreen display should turn red, indicating that your region settings have been changed.

Region Two:

- Press **Play**, **2**, **7** and **4** on the Remote Control. The on-screen display should then look like this: '____ ____'.
- Enter the following code using the Remote Controls number pad **001000 128 156**.
- Press the **Play** button on the Remote Control.
- The onscreen display should turn red, indicating that your region settings have been changed.

DVD-703

NOTE: Please note that this conversion may only work a maximum of 25 times! After this time the machine may end up locked to the last region changed

Multi-Region:

- Press **Play** on the Remote, followed by **1**, **5** and **9**
- When the display reads '_____' enter **005 000 128 156** using the Remote. (**Note:** the 12 digit code, when there are only 11 spaces. This is normal, just enter the whole code, and press **Play**)
- Press **Play** on the Remote
- Your player is now a Region 1 only player

Restore to Region Two:

- Press **Play** on the Remote, followed by **1**, **5** and **9**
- When the display reads '_____' enter **002 000 128 156** using the Remote (**Note:** the 12 digit code, when there are only 11 spaces.. This is normal, just enter the whole code, and press **Play**)

- Power **On** the player and **Open** the tray
- Press 2, 1, 6, 8 and **Enter**
- Enter the required region code, **0** for region free, **1** for region 1, **2** for region 2 and so on.

Reoc

A3

Multi-Region:

- Turn the player **On**
- Press the **Open/Close** button to open the disc drawer
- Enter the password(s) **8**, **4**, **2**, **1** or **9**, **9**, **9**, **9**, you will then see the current region code on the screen
- Select a Region code by pressing **Enter** continuously. The Region free code is **9**
- Press the **Open/Close** button again to close the disc drawer
- The process of selecting a Region code is now completed

VCD Hack:

- Turn the player **On**
- Press the **Open/Close** button to open the disc drawer
- Enter **5**, **1**, **6** and **8**
- Screen will now report that VCD playback is possible

A5

Multi-Region:

- Open a text editor and start with a new blank page. Type the exactly the following:

  TSDVDREG-2001-8608201-R0

- Select **File**, **Save** and call the file **CREGIN.TXT**
- Using your CD Burning software, burn this file to a CD-R or CD-RW

- Insert the freshly made disc into the A5 DVD player and after a short while **R0** will appear on the front title screen

This hack has been taken from **http://reoc.keyservice.co.uk/**. I would recommend visiting the above site for further information on the 'hack'.

A6

Multi-Region:

- Press the **Open** so the tray is ejected
- Press the **Setup** to enter the setup menu
- Press **1**, **3**, **6**, **9**, **Left**, **Left**, **Left**, **Right**
- The player will show a **Version Setup** item in the menu
- Press **Step**, **Previous**, **Next**
- The player should now be multi-region

Roadstar

DVD-2020H

- Press **Arrow down** to scroll
- Select **0** for region free
- Press **Enter**

Ronin

DVD-215

Multi-Region 1:

- Press **Setup** on remote control
- Enter **1**, **3**, **6**, **9**, **8**, **8**, **8** and **8**
- Select **Version** from the menu by pressing **Enter**
- On **Regional Code** press **Right** (>) button
- Use **Down** button to change region to **0**
- Press **Enter** on remote control to save

Multi-Region 2:

- **Open** tray and press **Setup**
- Enter **9**, **7**, **3** and **5**
- Select **Region** and set to **0**
- **Exit** Setup Menu

AMW-280

Multi-Region:

- Make sure there is **no** DVD in the machine
- Press **Setup** button
- Press **Right** arrow **three** times to enter preferences
- Enter **1**, **3**, **7** and **9**
- This will take you into the multi region menu
- Press arrow **Up** or **Down** to Region **0**
- Press **Play** or **Enter**

Rowa

DVD-280, DVD-3610

Multi-Region Hack 1:

- Press **Open/Close**, **Zoom**, **A-B**, **Up**, **Left**, **Down** and **Right**

Multi-Region Hack 2:

- Turn the player **On** without a disc in and leave disc tray **Open**
- On the remote press **Set-up**
- Use **Right** arrow to select **General** then **Basic**
- Press **Enter** on the remote followed by **Display**
- You should see the region code and the OSD version that the player is set to
- Press **Condition/Memory** on the remote
- Press **1**, **2**, **3**, **4**, **5** or **6** to change the region code
- Press **Display** to set the new region
- Press **Set-up** on the remote to exit

DVD-800

Multi-Region:

- **Open** tray and press **8**, **4**, **2** and **1** or **2, 1**, **6** and **8**
- Press **Enter** to set region - region **9** is all regions
- To exit the region set menu just press **Open/Close**

Samsung

HT-DM150, HT-DM550

Multi-Region:

- Switch **Off** player and **Unplug** from mains wait 30 seconds
- Reconnect to mains
- Turn **On** player with remote
- Press **Enter** on the remote
- Press **8**, **4**, **2**, **6** and **9** on the remote
- Press **Enter** on the remote
- The tray will **Open** and player will power **Off** and **Close** tray
- Switch **On** power from remote
- Player is now Region Free

DVD-M107

Multi-Region:

Multi-region Codes 1

- Perform a cold start

- Power **On** the player and press **Play** and **Next** on the DVD player (note that that you can also press **Play** and **Next** on the Remote Commander)
- The language options pop up. Release the **Play** and **Next** buttons
- Select the language between **1** and **6**

Multi-region Codes 2

- Press the **Repeat** button on the Remote Commander
- Using the Remote Commander, enter the code below corresponding to the region that your player is currently set to

  o for Region **1** use: **2**, **9**, **3**, **3** and **4**
  o for Region **2** use: **3**, **8**, **7**, **6** and **7**
  o for Region **3** use: **5**, **6**, **7**, **3** and **2**
  o for Region **4** use: **7**, **6**, **8**, **8** and **4**
  o for Region **5** use: **5**, **3**, **8**, **1** and **4**
  o for Region **6** use: **2**, **4**, **4**, **6** and **2**

- The current region setting of your player will display on the screen of the TV
- Press **9** on the Remote Commander for a Region free setting
- Press **Open** and load a DVD (of a region setting that your dvd player could not play previously).
- **Stop** and power **Off**

DVD-S124

Multi-Region:

- Leave disc tray empty.
- Power **Up** player.
- Press **Play** and **Stop** on player simultaneously for around 3 seconds
- A language screen should appear.
- Press **Repeat** on remote then **7**, **6**, **8**, **8** and **4**
- Press **9** for region free player.
- Press the **Open** button on player.
- After 15 sec press **Power/Standby** on remote.

DVD-S224

Multi-Region:

- Turn on the player and ensure that there is no disc in the machine
- Using the remote, in quick succession press **Menu**, **Repeat**
- Press **7**, **7**, **6**, **8**, **8**, **4**, **9** then **Open/Close**
- Count up to fifteen before powering off the player with the remote

If the above code fails to work then you may want to try the following code:-

- Press the **Repeat** button on your remote control NB: Do not confuse this with the Repeat A-B button
- Press the buttons **5**, **7**, **5**, **3** and **8** on your remote control, in order one at a time
- The numbers **02** will be displayed on the top left of your onscreen display
- Press the **1** button on your remote control for region 1, **2** for region 2, and so on, or **9** for multi-region playback
- Press the **Open** button on your remote control
- After 15 seconds have elapsed, power off your player and then power on your player

The above steps need to be performed fairly quickly (Although not VERY quickly)

DVD-511, DVD-611, DVD-709, DVD-711, DVD-809, DVD-811, DVD-909, DVD-MC20, DVD-M105, DVD-M108, DVD-M203, DVD-M204, DVD-M205, DVD-M405, DVD-HD937

Multi-Region Code 1:

- Always perform a Cold Start before applying the hack
- Power **On** your player whilst pressing hold both the **Play** and **Stop** buttons on the front player
- After a short while you should be presented with a set of language options. **Release** the Play and Stop buttons on the player
- You will now need to select a language option between **1** and **6**

Multi-Region Code 2:

- Press the **Repeat** button on the Remote Control
- Using the Remote enter the code below, note that you must know what Region your player is **currently** set to in order to know which code is appropriate

    - for **Region 1** use **2**, **9**, **3**, **3** and **4**
    - for **Region 2** use **3**, **8**, **7**, **6** and **7**
    - for **Region 3** use **5**, **6**, **7**, **3** and **2**
    - for **Region 4** use **7**, **6**, **8**, **8** and **4**
    - for **Region 5** use **5**, **3**, **8**, **1** and **4**
    - for **Region 6** use **2**, **4**, **4**, **6** and **2**

- A code should be displayed on the screen indicating the current Region setting of your unit
- Press the **9** button on the Remote Control for Region free, or **1** for Region 1, **2** for Region 2 and so on
- Press the **Open** button on your player
- Press the **Standby** button on the Remote Control

Firmware Version 5.02E:

- Power on your player
- Press and hold both the **Play** and **Stop** buttons on the player itself
- After a short while you should be presented with a set of language options. **Release** the play and the stop buttons on the player
- You will now need to select a language option between **1** and **6**
- Press the **Repeat** button on your Remote Control
- Now using your Remote Control enter the code below, note that you must know what Region your player is currently set to in order to know which code is appropriate, for **Region 2** use **5**, **7**, **5**, **3**, **8** instead of **3**, **8**, **7**, **6**, **7**
- A code should be displayed on the screen indicating the current Region setting of your unit
- Press the **9** button on your Remote for Region free, or press **1** button for Region 1, button **2** for Region 2 and so on
- Press the **Open** button on your player
- Press the **Standby** button on your Remote Control

Further information has emerged for the very latest players. The only drawback with the below is that it isn't held when the player is switched off. You also need an **Aiwa** remote control, our forum visitor used the **Aiwa RC-7AS08**:

- Turn on the player
- **Open** the DVD tray
- Press **Sleep** on the Aiwa Remote, and you will see a cold start message on screen
- Press **Clock 3 times very quickly**, pressing and pressing, you will see an adjust message on front of DVD player
- Put any Region of DVD in and it will play

It may also work with other **Samsung DVD-Mxxx** models, but may not work for machines with the 5.02E firmware loaded. Try the **Samsung V-5000** hack, it **MAY** work.

If the player sticks on FBI Warning screens:

- Press **Forward Search** x2 or faster, the disc should skip straight to the main feature

DVD-M103

Multi-Region:

- Turn **On** your DVD Player with the remote control
- Press the **Open/Close** button on your remote control (tray will **Open**)
- Press the **Open/Close** button on your remote control (tray will **Close**)
- Press the **Repeat** button on remote

- Using the Remote enter the code below, note that you must know what Region your player is currently set to in order to know which code is appropriate

    - for Region **1** use **2**, **9**, **3**, **3** and **4**
    - for Region **2** use **3**, **8**, **7**, **6** and **7**
    - for Region **3** use **5**, **6**, **7**, **3** and **2**
    - for Region **4** use **7**, **6**, **8**, **8** and **4**
    - for Region **5** use **5**, **3**, **8**, **1** and **4**
    - for Region **6** use **2**, **4**, **4**, **6** and **2**

- A code should be displayed on the screen indicating the current Region setting of your unit
- Press **9** on remote for Region **free**, or **1** for Region **1**, **2** for Region **2** and so on
- Press **Open** on player
- Press **Standby** on remote

If the above code doesn't work then you may wish to try the codes <u>above</u>.

DVD-707, DVD-807, DVD-907

Multi-Region:

- Press the **DVD** button on your remote control.
- Press the **Open/Close** button on your remote control.
- Place a Region 1 disc in the tray.
- Press the **Open/Close** button on your remote control.
- Wait until the player ejects the disc, displaying an error message and leaving the tray open.
- Remove the Region 1 disc from the tray.
- Press the **Open/Close** button on your remote control.
- Wait until the display shows the words '**no disc**'.
- Press the buttons **Time Search**, **1**, **1**, and **9** on your remote control in order, one at a time.
- Press the **Open/Close** button on your remote control.
- Place a Region 1 disc in the tray.
- Press the **Open/Close** button on your remote control For newer firmware, or if the above method fails to work Repeat steps 1-8 as then before 9. Press the buttons **TV**, **2**, **0**, and **0** on your remote control in order, one at a time Repeat steps 10-12 as before.

Note: Earlier firmware versions will not play **The Matrix** or **There's Something About Mary** but can be upgraded, firmware update does not remove hack. This hack also removes Macrovision. This modification is only temporary on the **DVD-907** and will need reentering once the unit is powered off.

DVD-M101

Multi-Region:

- Insert a DVD from any Region.
- Press the **Play** and **FF** buttons together. The player should ask..."**ENTER DVD REGION" :___**
- Press "**0**" to make the player region free

This hack may also work on other **Samsung** players

DVD-S423, SV-DVD1E

Multi-Region Code 1:

- Always perform a Cold Start before applying the hack
- Power on your player whilst pressing hold both the **FF** and **Pause** buttons on the front player
- After a short while you should be presented with a set of language options. **Release** the Play and Stop buttons on the player
- You will now need to select a language option between 1 and 6

Multi-Region Code 2:

- Press the **TV View** button on the Remote Control until the Samsung DVD logo appears on the on-screen display
- Press the **Repeat** button on the Remote Control
  *NB: If this hack does not work then repeat the whole process but use the **Subtitle** button on your remote control **instead** of Repeat*
- Using the Remote enter the code below, note that you **must** know what Region your player is currently set to in order to know which code is appropriate

  - for **Region 1** use **2**, **9**, **3**, **3** and **4**
  - for **Region 2** use **3**, **8**, **7**, **6** and **7**
  - for **Region 3** use **5**, **6**, **7**, **3** and **2**
  - for **Region 4** use **7**, **6**, **8**, **8** and **4**
  - for **Region 5** use **5**, **3**, **8**, **1** and **4**
  - for **Region 6** use **2**, **4**, **4**, **6** and **2**

- A code should be displayed on the screen indicating the current Region setting of your unit
- Press the **9** button on the Remote Control for Region free, or **1** for Region 1, **2** for Region 2 and so on
- Press the **Open** button on your player
- Press the **Standby** button on the Remote Control

If the player sticks on FBI Warning screens:

- Press **Forward Search** x2 or faster, the disc should skip straight to the main feature

SV-DVD3E

Multi-Region:

- Always perform a **cold start** before applying the hack below
- Power **On** your player as normal
- Press and hold both the **Play** and **Forward** buttons on the player
- After a short while the words "No Disc" should appear from the onscreen display
- Release the **Play** and **Forward** buttons on the player
- Press the **Subtitle** and **Repeat** button on your remote control
- Using your remote control enter the code below, note that you must know what Region your player is currently set to in order to know which code is appropriate:

    - for **Region 1** use **2**, **9**, **3**, **3** and **4**
    - for **Region 2** use **3**, **8**, **7**, **6** and **7**
    - for **Region 3** use **5**, **6**, **7**, **3** and **2**
    - for **Region 4** use **7**, **6**, **8**, **8** and **4**
    - for **Region 5** use **5**, **3**, **8**, **1** and **4**
    - for **Region 6** use **2**, **4**, **4**, **6** and **2**

- A code should be displayed at the upper left of the screen showing the current Region setting of your unit
- Press the **9** on your remote control for Region free, or **1** for Region 1. Press **2** for Region 2, and so on
  Press the **Open** button on your player and play disc on tray
- Press the **Standby** button on your remote control
- Press **Standby** again, and wait until you see the **Samsung Digital** logo, press the **Play** button

SV-DVD40,SV-DVD50

Region Free:

- Power **On** player and ensure the tray is empty
- Using the remote press **Subtitle**, **5**, **7**, **5**, **3** and **8**
- The figure **2** should appear on your screen
- Press **9** on the remote
- Turn machine **Off** then **On**
- Please should now be region free

DVD-V5000

Multi-Region Code 1:

- Press the **Open** button on your remote control
- **Close** the tray on the DVD player
- After 15 seconds have elapsed, power **Off** your player (switch the unit to stand-by mode) and then power **On** your player

Finished and ready to play all regions

Sampo

DVD-320, DVD-360, DVD-520, DVD-K535, DVD-K565, DVD-560 and DVD-620

Multi-Region:

To see what version of the firmware your player is using:

- Press the **Setup** button on your Remote Control
- Press the buttons **1**, **2**, **3** and **4** on the Remote
- You should now see the firmware version date

Converting this player to all region:

- Press the **Setup** button on your remote control.
- Using the onscreen menu, select the **Preferences** option.
- Press the **Still/Step** button on your remote control.
- Press the **Prev** button on your remote control.
- Press the **Next** button on your remote control.
- You will now enter the hidden setup page, and can change the player to any Region or set it to Region Free. You can also disable Macrovision from this menu.

Please note the following if you have a very new **Sampo** DVD player, although note that this **MAY** or **MAY NOT** be relevant to the **DVD-620**:

"A quick guide on how to get round the recent removal of the hidden menus on the **Sampo DVD-320**, **DVD-360**, **DVD-520**, **DVD-560**, **DVD-K535** and **DVD-K565** models. First you will need access to a CD-R drive, secondly visit the http://www.dvdschmiede.de/update.htm where you can download the relevant CD images for both the new firmware and older which includes the menus.

After this its simply a case of burning yourself two CD-ROMs. Insert the older firmware CD and downgrade your system to the earlier version with the hidden menus, then configure the system to bypass region checking and optionally Macrovision. Finally insert the new firmware CD and upgrade to the latest.

Even though you will not be able to access the hidden menus, the settings you made from the earlier firmware will remain present. As for the bad news, this doesn't work on the new **Apex 600A** with the N4 EPROM and the 4318 Video Drive."

DVE-660

Multi-Region:

Checking the firmware revision:

- Press **Setup** then enter **1**, **2**, **3**, **4**, **5** on the Remote Control

To change Region:

- Press **Setup** then enter **3**, **8**, **8**, **8**, **3** on the Remote Control
- Enter the required region ID or **Bypass** (Will Play ALL Regions except some Region Code Enhanced Discs)

Setting CSS and Macrovision:

- Press **Setup** then enter **5**, **9**, **0**, **4**, **1**, **9** on the Remote Control
- The **CSS** can be enabled or disabled
- The **MACROVISION** can be enabled or disabled

Adjusting PAL/NTSC Modes:

- Press **Setup** then enter **7**, **2**, **5**, **5**, **5** on the Remote Control

If the above modification fails to work then you may wish to try the modification for the **Sampo DVD-520** above

Sanyo

DVD-1550A, DVD-5100, DVD-6070, DVD-7201

Multi-Region:

- Press the **Program** button on your remote control
- Press **Right Cursor**, **Right Cursor**, **Enter** and **Play**

Schneider

DVD-511, DVD-811

- Power on the player and press the **Setup** button on your remote
- Press **3**, **7**, **7**, **7** and **4**
- You will now enter the hidden setup page, and can change the player to any Region or set it to Region Free

Multi-Region Hack 3:

- Power on the player and press the **Setup** button on your remote
- Using the onscreen menu, select the Preferences option
- Press **Still/Step**, **Prev** and **Next**
- You will now enter the hidden setup page, and can change the player to any Region or set it to Region Free. You can also disable Macrovision from this menu

Video output format between PAL and NTSC:

- Power on the player and press the **Setup** button on your remote
- Press **7**, **2**, **5**, **5** and **5**
- You should now be able to change the output between PAL, NTSC and Auto

Disable Macrovision:

- Power on the player and press the **Setup** button on your remote
- Press **5**, **9**, **0**, **4**, **1** and **9**
- You will now enter the hidden setup page, and can turn Macrovision off and also disable CSS

Firmware Display 1:

- Power on the player and press the **Setup** button on your remote
- Press **1**, **2**, **3**, **4** and **5**.
- You should now see the firmware version date

Firmware Display 2:

- Power on the player and press the **Setup** button on your remote
- Press **1**, **2**, **3** and **4** on your remote control
- You should now see the firmware version date

<div align="center">

DV-740

</div>

Multi-Region - US/Canada DV-740U:

- Open up **Windows Notepad** or similar text editor, and type in, or copy and paste "**TSDVDREG-2001-9629735-R0**" (without the quotation marks, this code for Region free).
- Save the file as "**CREGIN.TXT**" (again, without the quotation marks)
- Burn this single file to a CD-R using ISO 9660 Mode 1 format (**not** Joliet).
- Insert the CD into the DV-740H - note this is not a firmware flash, merely accessing a factory setting.
- "R0" should appear in the bottom left of the screen - if it does not you may already have a multi-region player.

Multi-Region - Australia/New Zealand/Singapore DV-740X:

- Open up **Windows Notepad** or similar text editor, and type in, or copy and paste "**TSDVDREG-2001-8918448-R0**" (without the quotation marks, this code for Region free).
- Save the file as "**CREGIN.TXT**" (again, without the quotation marks)
- Burn this single file to a CD-R using ISO 9660 Mode 1 format (**not** Joliet).
- Insert the CD into the DV-740H - note this is not a firmware flash, merely accessing a factory setting.
- "R0" should appear in the bottom left of the screen - if it does not you may already have a multi-region player.

Multi-Region - UK/Europe DV-740H/DV-740S:

- Open up **Windows Notepad** or similar text editor, and type in, or copy and paste "**TSDVDREG-2001-8939912-R0**" (without the quotation marks, this code for Region free).
- Save the file as "**CREGIN.TXT**" (again, without the quotation marks)
- Burn this single file to a CD-R using ISO 9660 Mode 1 format (**not** Joliet).
- Insert the CD into the DV-740H - note this is not a firmware flash, merely accessing a factory setting.
- "R0" should appear in the bottom left of the screen - if it does not you may already have a multi-region player.

DVS-15H

Multi-Region

- Power the player **On** and **Open** the tray
- Using the remote press **3**, **3**, **0**, **8**, **8** and **0**
- **Close** the tray and power the player **Off**

Sherwood

DVD-V756

SM 2400, SM 2500

Multi-Region:

- **Open** the tray
- Type **9**, **9**, **9** and **9** on the remote

- Press the **OK** key until the region code you want appears (9 is code free)
- **Close** the tray

Sony

Please note:- People have being reporting that these Sony hacks don't work. These instructions come from a sheet supplied by vendors that sell pre-chipped players. They then add these extra features to the firmware. A plain unmodified player will **not** respond to these button press combinations.

For more information try Norway based company **www.tronika.co.no**. If you go to the Sony DVD player section you can either buy a pre-modded player or DIY kit. The only way to make your player multi-region is to either modify the player yourself (not recommended if you are not handy with a soldering iron) or get your hands on a Sony DVD service remote which you may be able to rent for about £40.

NS355

This hack requires a **One For All 7040** remote

Using the One For All 7040 remote

- Select **DVD** device on remote
- Hold **Magic** button until DVD button flashes twice
- Press **0**, **5**, **3** and **3**

Set Up Device DVD Player

- Put a disc in player and put player onto welcome screen
- Hold **Magic** button down until DVD button on remote flashes twice
- Press **9**, **9** and **4**
- Press **Magic** button
- Press **1**, **8**, **9** and **1**
- Repeat steps **2** to **4**, then press **2**, **5**, **5** and **2**
- Repeat steps **2** to **4**, then press **0**, **9**, **5** and **3**
- Repeat steps **2** to **4**, then press **2**, **2**, **1** and **4**
- Repeat steps **2** to **4**, then press **0**, **7**, **9** and **5**
- Remove disc from the player, then put player on stand by
- Press **1**, **2**, **3**, **4** and **5** (success will be displayed and comes out of stand by
- Press **1**, **2**, **3**, **4** and **5** (player goes into stand by and your player is now region free)

DAV-S300

Multi-Region:

- Put the player into **Standby** mode

- Press **1** and **Return** on remote for region 1, **2** and **Return** for region 2, and so on. Use **0** and **Return** to return player to default region settings
- Press **P-Mode** and **Return** to play DVD's with the selected region, auto-switching is **Off**
- Press **Audio** and **Return** for auto-switching **On**
- Press **Angle** and **Return** for MacroVision **On**
- Press **Subtitle** and **Return** for MacroVision **Off**

DVP-M35

Multi-Region:

- Insert required disc and press the **Menu** button
- Select **Program** button then select a few chapters
- Press **Play**, **Stop**, **Play** until the film starts
- This may take some time to work and the film may start playing somewhere in the middle, but once it starts playing you can skip back to the beginning of the film

DVP-C660, DVP-C670D

Multi-Region:

- Switch player to **Standby**
- Using remote press **5**, **5**, **5** followed by **Menu**
- Hold down **3** for 3 seconds

If the above fails to work then you may wish to try:

- Switch player to **Standby**
- Press **Title**, **Clear**, **Power**
- Press the required region number

DVP-CX860

Multi-Region:

- **Open** the drive tray
- Enter **9**, **8**, **1**, **7** on remote to access the system menu
- Select region from **1** to **6** or set it to **9** for Multi-region. Macrovision can be disabled from this screen

DVP-NS300, DVP-NS305, DVP-NS400D, DVP-NS700, DVP-S330, DVP-S335, DVP-S360, DVP-S336, DVP-S525D, DVP-S530D, DVP-S535D, DVP-S536D, DVP-S725D, DVP-S735D

Multi-Region:

- Turn **On** the unit with the remote controller
- Wait until "no disc" appears in the unit's display
- Press **Pause**, **3**, **1**, **4**, **1**, **5**, **9**

- The word "**CODE**" should appear in the display
- Within five seconds, press the key that corresponds to the zone you want i.e. **0** for region free, **1** for region 1, **2** for region 2 and so on
- Again, within 5 seconds, press **Pause** and **Power**

If the above fails to work then you may wish to try the following:

- Put the player into **Standby** mode
- Press **1** and **Return** on remote for region 1, **2** and **Return** for region 2, and so on. Use **0** and **Return** to return player to default region settings
- Press **P-Mode** and **Return** to play DVD's with the selected region, auto-switching is **Off**
- Press **Audio** and **Return** for auto-switching **On**
- Press **Angle** and **Return** for MacroVision **On**
- Press **Subtitle** and **Return** for MacroVision **Off**

DVP-S725D

Multi-Region:

- Press and hold **Clear**, **Menu** and **4**
- A menu will be displayed allowing you to set the region

If this fails to work then you may wish to try one of the codes listed above

PS-2

Multi-Region:

- Press **O** x 2 times
- Press **R1** x 5 times
- Press **X** x 7 times

AVD-LS10

Multi-Region:

- Download this file: **www.home.no/trsolhei/avd-ls10.zip**
- Power **On** the player and the TV
- Insert the disc and wait a few seconds
- TV shows the service menu
- Press **0** on the remote to set the region
- The disc will spin for some seconds. Then the tray will open automatically and TV will show conformation message on OSD
- Take out the disc and power **Off** into standby mode. Tray will close automatically and the power will go off
- Power **On** again

- Standby LED will flash for some seconds and power will go off again.
- Power **On** again
- Insert the disc and verify that the service menu shows the correct region
- Take out the service disc.

Sunstech

DVP-T303

Multi-Region (in English):

- Using the remote **Open** drive tray

- Press **Play** button to select the region (please note that we defined digit **9** instead **0** for region free) code
- Press **Setup** button to exit settings

DVD-5520

Multi-Region Hack

A number of visitors have claimed that their **Yamaha DVD-5520** player is not multi-region out of the box as it should be. However, if this is a problem there is a firmware fix available.

- Download the firmware update from here (if it is not available here then please let us know)
- Extract the file to your hard drive and burn the **11121213.BIN** to the root directory of a CD. Use Standard ISO9660 Format and finalize the CD. Don't use Joliet, multi-session or XA Format!
- The CD title **must** be **P80J0001**. Don't copy both firmware versions on one CD. You have to use separate CDs.

- Insert the ready CD into the DVD-Player and press **Play** when prompted.
- When the CD drive opens take out the CD and wait about 1-2 minutes.
- The DVD player will be reset automatically

Yamaha

DVD-S510, DVD-S520

Multi-Region Hack 1:

This hack should work on all Philips DVD players as of **06/01/2001** with any firmware version, and other similar models by manufacturers such as **Grundig**, **Marantz** and **Philips**.

- Send the infra-red code **RC6** (aka **Codeset 4**, **Key 235**) to your player. You can do this with a <u>OneForAll</u> remote such as the OneForAll 6 (or URC7560) or OneForAll 4 Digital with the following instructions:

    - Configure the Remote using the setup code **0539**
    - Press the **Magic** button
    - Enter the code **085**

    If you own a Palm Pilot, you may also use <u>Pacific Neo-Tek's OmniRemote</u> software to generate the **RC6** code using a downloadable .pdb file.

    - Download the .pdb file into your Palm Pilot
    - Press the OmniRemote key marked as 955 Multizone

- The onscreen display should show **11** spaces like this: '**-----------**'
- Using the number keys on your DVD player's Remote Control, enter the code **222 222 005 255**. Note that this is 12 digits and the last digit will not show on the on-screen display
- Press the **Play** button on the DVD player's Remote
- The onscreen display should now show the words **No Disc**
- Power off your DVD player, wait **10** seconds and then power back on

Multi-Region Hack 2:

You may also use the following methods for players with firmware 6.2:

- Turn your DVD player **On**
- The display will show you **no disc**
- Press **Play** and then press **1**, **5**, **9** on the DVD Remote
- On DVD display will appear **------ -----**
- Key in **101 040 000 140** on the Remote when you press the last digit you will see a little point
- Press **Play**

- The player will be turned off
- Your DVD is ready

DVD-S540

Multi-Region Hack:

- Press the **Open** button on your DVD-player to **Open** the drive tray
- Using the remote press **9**, **9**, **9** and **9** on your remote control
- Press the **1** button on your remote control for region **1**, **2** for region **2**, and so on, or **0** for multi-region
- Press **OK** and the tray will close
- Reset the unit by powering **Off** and then back **On** again

Yukai

DVD-V300
